5. COURSE

Each course / subject is to be designed under lectures / tutorials / laboratory or field work / seminar / practical training / Assignments / Term paper or Report writing etc., to meet effective teaching and learning needs.

6. COURSE OF STUDY AND CREDITS

The Course Components and Credit Distribution shall consist Part I, II & III:

The UG programme consists of a number of courses. The term 'course' is applied to indicate a logical part of the subject matter of the programme and is invariably equivalent to the subject matter of a 'paper' in the conventional sense. The following are the various categories of courses suggested for the UG programmes.

Part I – Language Courses (LC) (any one of Tamil, Hindi, French or special subject designed in lieu of the above).

Part II – English Language courses (ELC) or special subject designed in lieu of. The Language courses and English Language Courses are 4 each / 2 each in number and the LC and ELC are meant to develop the students communicative skill at the UG level.

Part III – Core courses i.e. major courses that compulsorily required for each of the programme of study (CC), Ability Enhancement Course (AHC), Discipline Specific Elective Course (DSE) and Skill Enhancement Course (SEC).

For each course, credit is assigned based on the following:

Contact hour per week CREDITS

1 Lecture hour - 1 Credit

• Qualification Descriptors

A qualification descriptor indicates the generic outcomes and attributes expected for the award of a particular type of qualification (for example, a bachelor's degree or a bachelor's degree with honors). The qualification descriptors also describe the academic standard for a specific qualification in terms of the levels of knowledge and understanding, skills and competencies and attitudes and values that the holders of the qualification are expected to attain and demonstrate. These descriptors also indicate the common academic standards for the qualification and help the degree-awarding bodies in designing, approving, assessing and reviewing academic programmes. The learning experiences and assessment procedures are expected to be designed to provide every student with the opportunity to achieve the intended programme learning outcomes. The qualification descriptors reflect both disciplinary knowledge and understanding as well as generic skills, including global competencies that all students in different academic fields of study should acquire/attain and demonstrate.

Qualification descriptors for a Bachelor's Degree programme

The students who complete three years of full-time study of an undergraduate programme of study will be awarded a Bachelor's Degree. Some of the expected learning outcomes that a student should be able to demonstrate on completion of a degree-level programme may include the following:

Demonstrate (i) a fundamental/systematic or coherent understanding of an academic field of study, its different learning areas and applications, and its linkages with related disciplinary areas/subjects; (ii) procedural knowledge that creates different types of professionals related to the disciplinary/subject area of study, including research and development, teaching and government and public service; (iii) skills in areas related to one's specialization and current developments in the academic field of study.

- Use knowledge, understanding and skills required for identifying problems and issues, collection of relevant quantitative and/or qualitative data drawing on a wide range of sources, and their application, analysis and evaluation using methodologies as appropriate to the subject(s) for formulating evidence-based solutions and arguments;
- Communicate the results of studies undertaken in an academic field accurately in a range of different contexts using the main concepts, constructs and techniques of the subject(s);
- Meet one's own learning needs, drawing on a range of current research and development work and professional materials;
- Apply one's disciplinary knowledge and transferable skills to new/unfamiliar contexts, rather than replicate curriculum content knowledge, to identify and analyse problems and issues and solve complex problems with well-defined solutions.
- Demonstrate subject-related and transferable skills that are relevant to some of the job trades and employment opportunities.

- These courses have opened the floodgates in the area of accounts and other core industries, and other professional studies CA, ICWA etc.
- Courses of this program provide bright future in the IT fields, Software, Banks,
 Companies, BPOs and KPOs.
- This program courses consist of both theoretical as well as good practical exposures to the students in the relevant areas to meet the industries expectations.
- Courses of the program provide the cost benefit analysis and SWOT analysis enables the students for cost consciousness of each and every business operations.

6. Teaching Learning Processes

The teaching learning processes play the most important role in achieving the desired aims and objectives of the undergraduate programs in B.COM - Corporate Secretaryship as elaborated in detail in the learning Outcomes based curriculum framework (LOCF). We should therefore have an excellent teaching-learning procedural protocol for all the colleges, universities and other higher education institutions (HEI). To be specific, it is desirable to have:

- ❖ Necessary and sufficient infrastructural facilities for the class rooms, and libraries equipped with adequate modern and modular furniture's and other requirements.
- Sufficient infrastructure for ICT and other facilities needed for technology-enabled learning like computer facilities, PCs, laptops, Wi-Fi and internet facilities with all the necessary software's.
- Sufficient number of teachers in permanent position to do all the class room teaching and perform and supervise the work to be done by the students.
- All the teachers should be qualified as per the UGC norms and should have good communication skills.
- Sufficient number of technical and other support staff to run the libraries, equipment and maintain the infrastructural facilities like buildings, electricity, sanitation, cleanliness etc.
- ❖ Teachers should make use of all the approaches for an efficient teaching-learning process.
- Class room teachings with lectures using traditional as well as electronic boards.
- Use of Smart class rooms for simulation and demonstration for conveying the difficult concepts of Corporate Secretaryship in class room teaching and online teaching.
- ❖ Tutorials must be an integral part of all the theory and Accountancy courses should have 1 to 2 tutorials every week depending upon the nature of the course.
- ❖ Teaching should be complimented with students' seminar to be organized very frequently.
- Guest lectures and seminars should be arranged by eminent teachers to be invited by the concerned college/university/HEI.
- Open-ended project work should be given to all students individually or in group to 2-3 students depending upon the nature of the course.

- ❖ Special attempts should be made by the institution to develop problem-solving skills at the UG level. For this purpose a mentor system may be evolved where 3-4 students may be assigned to each faculty member.
- ❖ Teaching load should be managed such that the teacher has enough time to interact with the students to encourage an interactive/participative learning.

7. Assessment Methods

Since the Learning Objectives are defined clearly for each course in detail, it is easier to design methods to monitor the progress in achieving the learning Objectives during the course and test the level of achievement at the end of the course.

The priority should be given to Formative Assessment for monitoring the progress towards achieving the Learning Objectives while keeping its weightages lower than Summative Assessments.

This is to assure that the students know their strengths and weaknesses periodically through the results of Formative Assessments and make amendments for the gaps in their knowledge without affecting their final grades in any significant way..

- Some of the methods suggested for Theory Component with regard to Formative Assessment are:
 - a. Regular Tutorial assignments
 - b. seminar presentations
 - c. Performance in group discussions
 - d. Problem based longer assignments (other than tutorials)
 - e. True/False Tests
 - f. Multiple Choice Tests
 - g. Short Answer Tests

- h. viva-voce tests
- i. Any other innovative tests in the context of the course.
- ❖ In the case of substantive Summative Assessment for the theory papers, can be a combination of the following:
 - a. Mid -Semester test
 - b. Seminar Report
 - c. Individual /Team Project report
 - d. Oral Presentations of Seminar/Projects
 - e. Viva -Voce Examination on the above reports
 - f. End Semester closed book examination in the pattern of a) Multiple Choice
 - b) Short Answer c) Long Answer vii) End Semester

Here, effectiveness implies gaining knowledge and skill which can be applied to solve practical problems as well as attaining capability of logical thinking and imagination which are conducive to new knowledge and new discoveries. Once the student learns, 'why is it worth learning?' and 'how does it connect to the real world?' The student shall embrace the curriculum in a way which would incite imagination and imbibe a spirit of enquiry in them, so that in future they will opt for further investigations or research. Needless to say, there should be a continuous evaluation system for the students. This will enable the teachers not only to ascertain the overall progress of learning by the students, but also to identify the students who are slow learners and for whom special care should be taken. An appropriate grading system is the 'relative grading system' can also be envisaged for certain papers, introducing a competitive element among the students. All in all, the teacher should act as a facilitator and guide and not as a guardian of curriculum.

❖ HEI can design their own ways and methods to quantify the assessment and evaluation based on the above methods. It would then be converted to the letter grades by the procedure described by the template given by the UGC.

❖ Once the letter grade for a course is obtained for a course, it should be done for all the courses offered by the student. Once the letter grades for all the grades are accumulated then a CGPA should be calculated by quantifying the letter grades as described by the template provided by the UGC.
