Title of invention:

WATER CONSUMPTION CONTROL SYSTEM FOR IRRIGATION BASED ON IoT

Name of inventor(s):

P., Padmanabhan; Arun, S. and A., Nageswaran

Term of Patent:

Eight years from 15 September 2020

NOTE: This Innovation Patent cannot be enforced unless and until it has been examined by the Commissioner of Patents and a Certificate of Examination has been issued. See sections 120(1A) and 129A of the Patents Act 1990, set out on the reverse of this document.

Dated this 14th day of October 2020

Commissioner of Patents

PATENTS ACT 1990

The Australian Patents Register is the official record and should be referred to for the full details pertaining to this IP Right.

Extracts from the Patents Act, 1990

Sect 120(1A) Infringement proceedings in respect of an innovation patent cannot be started unless the patent has been certified.

Sec 128 **Application for relief from unjustified threats**

- (1) Where a person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings a person aggrieved may apply to a prescribed court, or to another court having jurisdiction to hear and determine the application, for:
- (a) a declaration that the threats are unjustifiable; and
 - (b) an injunction against the continuance of the threats; and
 - (c) the recovery of any damages sustained by the applicant as a result of the threats.
- (2) Subsection (1) applies whether or not the person who made the threats is entitled to, or interested in, the patent or a patent application.

Sec 129A **Threats related to an innovation patent application or innovation patent and courts power to grant relief.**

Certain threats of infringement proceedings are always unjustifiable.

- (1) If:
- (a) a person:
 - (i) has applied for an innovation patent, but the application has not been determined; or
 - (ii) has an innovation patent that has not been certified; and
 - (b) the person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings in respect of the patent applied for, or the patent, as the case may be; then, for the purposes of an application for relief under section 128 by the person threatened, the threats are unjustifiable.

Courts power to grant relief in respect of threats made by the applicant for an innovation patent or the patentee of an uncertified innovation patent

- (2) If an application under section 128 for relief relates to threats made in respect of an innovation patent that has not been certified or an application for an innovation patent, the court may grant the application the relief applied for.

Courts power to grant relief in respect of threats made by the patentee of certified innovation patent

- (3) If an application under section 128 for relief relates to threats made in respect of a certified innovation patent, the court may grant the applicant the relief applied for unless the respondent satisfies the court that the acts about which the threats were made infringed, or would infringe, a claim that is not shown by the applicant to be invalid.

Schedule 1 **Dictionary**

certified, in respect of an innovation patent other than in section 19, means a certificate of examination issued by the Commissioner under paragraph 101E(e) in respect of the patent

Abstract:

India lives in it villages. Villages are now urbanises by Smart city Mission of Indian government. Mission proposes to provide core infrastructure and responsive governance citizen by connecting internet to physical devices like streetlight, municipal infrastructure, parking meters, etc. Transportation, the keystone of urbanisation need to be res terms of traffic i i congestion, automated driverless public transport all-around the clock and smart parking system. The proposed smart parking system includes IoT mod monitor and signalize available I parking spaces. Mobile application could enable the driver to locate available parking space and book the space then pay for parking thro wallet. This system would avoid traffic congestion on arterial roads by unauthorized parking and regulate parking fee collection for better municipal service.

Complete Specification

Today's world of communication reaches the Sun and the Mars. The technological development connects physical devices with internet and redefines the network connectivity. Indian government proposes for smart city in every state. The Mission denotes better infrastructure in implementing cities. Such cities need to manage the traffic smart. The traffic usually arises by improper parking system and poor road conditions. Mostly the drivers don't know about the available safe parking areas around the city. So they park upon their feasibility and this leads to unexpected road congestion or sometimes accident. By understanding the importance of safe parking zones and regulates parking fee collection to improve the road service better. The parking system should be improved by monitoring for Empty space and notify such spaces in and around the vehicle traversing zone. So the driver could choose an appropriate space and pay the levied fee through e-wallet.

Summary

The proposed system intends to resolve parking nuisances and provide hassle free road for commuters. The parking system monitor the parking zone, signalize the traversing vehicle through the mobile application indicating the parkable space and fee to be paid for the time slot. The vehicle driver would choose the space and pay through e-wallet. In Smart parking system, IoT is the inter-network of the devices and physical objects, number of objects gather data at remote locations and communicate to units managing, acquiring, organizing and analyzing the data in the processes and services. It provides a vision where things (wearable, watch, alarm clock, home devices surrounding objects with) become smart and behave alive through sensing, computing and communicating by embedded small devices which interact with remote objects or persons through connectivity. Cloud computing offers cheap and effective ways of connecting, tracking, and managing devices from anywhere over the internet. By the use of built-in applications IoT systems could monitor and control things on a real-time basis through remote locations.
